SECTION 4: First aid measure	98
4.1. Description of first aid me	asures
General information	Keep affected person away from heat, sparks and flames. Move affected person to fresh air at once. Get medical attention if any discomfort continues.
Inhalation	Move affected person to fresh air at once. For breathing difficulties, oxygen may be necessary. If breathing stops, provide artificial respiration. Keep affected person warm and at rest. Get medical attention immediately.
Ingestion	Do not induce vomiting. Remove affected person from source of contamination. Rinse mouth thoroughly with water. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Get medical attention immediately. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs.
Skin contact	Remove affected person from source of contamination. Remove contaminated clothing. Wash skin thoroughly with soap and water. Get medical attention if irritation persists after washing.
Eye contact	Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 15 minutes. Continue to rinse for at least 15 minutes. Get medical attention if irritation persists after washing.
4.2. Most important symptoms	and effects, both acute and delayed
Inhalation	Coughing, chest tightness, feeling of chest pressure. Nausea, vomiting. Exhaustion and weakness.
Ingestion	Nausea, vomiting. Drowsiness, dizziness, disorientation, vertigo.
Skin contact	Skin irritation.
Eye contact	Irritation of eyes and mucous membranes.

SECTION 5: Firefighting meas	sures
5.1. Extinguishing media	
Suitable extinguishing media	Extinguish with the following media: Foam. Dry chemicals, sand, dolomite etc.
5.2. Special hazards arising fr	om the substance or mixture

Specific hazardsToxic gases/vapours/fumes of: Carbon dioxide (CO2). Carbon monoxide (CO). May explode
when heated or when exposed to flames or sparks. Vapours are heavier than air and may
spread near ground and travel a considerable distance to a source of ignition and flash back.

5.3. Advice for firefighters

Protective actions during firefighting	Avoid breathing fire gases or vapours. Cool containers exposed to flames with water until well after the fire is out. Control run-off water by containing and keeping it out of sewers and watercourses. Ventilate closed spaces before entering them. Move containers from fire area if it can be done without risk. Risk of re-ignition after fire has been extinguished. Do not use water jet as an extinguisher, as this will spread the fire.	
Special protective equipment for firefighters	nt Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protectiv clothing.	
SECTION 6: Accidental releas	e measures	
6.1. Personal precautions, pro	tective equipment and emergency procedures	
Personal precautions	Wear protective clothing as described in Section 8 of this safety data sheet. No smoking, sparks, flames or other sources of ignition near spillage. Avoid inhalation of vapours and contact with skin and eves. Provide adequate ventilation.	

6.2. Environmental precautions

Environmental precautions Do not discharge into drains or watercourses or onto the ground.

6.3. Methods and material for containment and cleaning up

Methods for cleaning upEliminate all sources of ignition. No smoking, sparks, flames or other sources of ignition near
spillage. Provide adequate ventilation. Wear suitable protective equipment, including gloves,
goggles/face shield, respirator, boots, clothing or apron, as appropriate. Absorb in vermiculite,
dry sand or earth and place into containers. For waste disposal, see Section 13.

6.4. Reference to other sections

Reference to other sections For personal protection, see Section 8. See Section 11 for additional information on health hazards. For waste disposal, see section 13.

--------	-------------	----------	----------

Usage precautions	Avoid spilling. Avoid contact with skin and eyes. Keep away from heat, sparks and open
	flame. Provide adequate ventilation. Avoid inhalation of vapours. Use approved respirator if air
	contamination is above an acceptable level. Eliminate all sources of ignition. Eye wash
	facilities and emergency shower must be available when handling this product. Good personal
	hygiene procedures should be implemented. Wash hands and any other contaminated areas
	of the body with soap and water before leaving the work site. Do not eat, drink or smoke when
	using the product. Avoid inhalation of vapours.

7.2. Conditions for safe storage, including any incompatibilities

Storage precautionsKeep away from oxidising materials, heat and flames. Store in tightly-closed, original
container in a dry, cool and well-ventilated place. Keep only in the original container.
