Dök No: ÜRT-TDS-40 Yay.Tar.: 29.03.2010 Rev. No : REVİZYON-01 Rev.Tar. : 20.11.2018

	Sayfa : 1/1								
PRODUCT	PU VIP PLUS (2+1) TOPCOAT, ENAMEL								
PRODUCT CODE	291-X1XX								
COLOR	Cream and Grey colours are avaible.								
DESCRIPTION	It's a solvent borne 2 Pack Polyurethane high yellowing resistant topcoat enamel in different colors and matting degrees.

<sup>\*:</sup> The expected performance of the product depends on the accuracy of the mixing and dilution process. Since the presentation of the products is made by packing according to the mixing ratio by weight, it is especially recommended to be made by weight by weighing in order to be sensitive to the preparation of the mixture for the application.

## APPLICATION METHOD:

Preperation:Before mixing, first component should be stirred well, then first and second component are mixed according to mixing ratio as much as desired amount, mixture is stridded to obtain a homogenious mixture once again. Finally, for adjusting application viscosity, required amount (according to information which is given in mixin ratio) thinner is added by mixing. Make sure a homogenious mixture is obtaioned before application.

It is applied directly by spraying on the surfaces previously primed by any of Kubilay polyurethane (212-, 292-series), polyester primers (812-serie) or UV primer (822-seri). The product should be prepared according to mixing ratios given above and is sprayed in two or three cross-wise layers (Recommended: 70 - 80 gr/m2 for matte groups, 140 - 160 gr/m2 for glossy).

## STORAGE:

1st Components will remain stable for at least 12 months and 2nd Components (hardener) is 6 months when stored in their original packs in a dry place at storage temperatures between 5-35 °C.

It's recommended to read SDS before applications.

Important Note: This information is based on our present state of knowledge and is intended to provide general notes on Kubilay Products and their uses. However without garantee as conditions and methods of end users are beyond our control. We recommend that end users determine the suitability of the materials before adapting them on a commercial scale.
